DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 196-202 are rejected under 35 U.S.C. 102(e) as being anticipated by Teicher (5,744,787).

Teicher shows, figure 3, an electronic wallet 9 (mobile user terminal), a checkbook 320 (payment card), an electronic purse (electronic value card), connected financial institutions 20 (service providing system), a payment unit 8 (gate terminal), and account ID 321 with PIN (key data). POS 10 can be a vending machine or a telephone. (column 7, lines 44-46, telephone card) Column 14, lines 17-22, states that in a dual-pass free-access automatic retail system, two interactions between the electronic wallet and the payment system are required, one at an entrance location to gain access

(electronic ticket) to the accessible inventory and the second in an exit location to complete payment for the goods and/or services actually purchased. External interface 340 has secured protocols. (column 8, lines 58-59, encrypted electronic value card) Cellular data communication may be used. (column 10, line 3, mobile telephone). The method of using the Teicher system to make a purchase is inherent in the apparatus.

Response to Arguments

Applicant's arguments filed 9/16/04 have been fully considered but they are not persuasive. Applicant asserts that Teicher does not show a mutual authentication process. The very nature of a PIN has to be mutual.
